Dear Katherine,

On behalf of our Gracie Square Hospital teams and the patients we serve, I want to personally thank you and your generous donors for their handmade cards with messages of hope and support. We truly appreciate our partnership with *For Like Minds* – you and your card donors bring the “sunshine” every time! It is incredible to see the immediate positive reaction our patients have as they read the encouraging messages. You, yourself give a big “HELLO” as we round on each unit. Right away, you let everyone know about your own hospitalization and that there is always hope – that you are there to provide support and empathy. It is total joy to see the hugs, the conversations, the thank you’s, the “How did you know I needed this?” and the overall great vibes!

The time and care it takes to make the cards is evident and our patients love going through the various designs to find the one that connects with them. The chocolates are also a huge hit and appreciated by everyone.

As the only hospital in NYC dedicated solely to behavioral health, your cards and visits provide the compassionate, patient-centered care experience that we strive to provide to everyone that comes to us for help. We are truly so grateful Katherine – thank you again from all your friends at Gracie Square Hospital.

#team

All my best,

A handwritten signature in black ink, appearing to read "Jennifer M. Frost". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
